BACKEND	PHP · Node.js 22 · Express 5 · Fastify · REST API · Zod · grammY (bots)
CMS	WordPress (REST API)
DATABASES	PostgreSQL · MongoDB · SQLite · Prisma · Drizzle ORM
TOOLS	Git · Docker Compose · Caddy · CI/CD · Vitest · Playwright

PROJECTS

drillspb.ru — Oct 2026

Commercial project · PHP 8.3 migration

Migrated the website to PHP 8.3.

Stack: PHP 8.3

gmontage-spb.ru — Oct 2026

Commercial project · PHP 8.3 migration

Migrated the website to PHP 8.3.

Stack: PHP 8.3

gmontage-spb.ru — Oct 2025 – Nov 2025

Commercial project · PHP backend

Services website with cost calculation and regional sections.

- PHP backend: server logic for dynamic pages, forms and requests
- **Service cost calculation** and dynamic **regional sections**
- Refactoring existing code, bug fixes, new features

Stack: PHP, HTML5, CSS3, JavaScript

oscur.ru — Dec 2025 – Jan 2026

Commercial project · PHP backend

Website with an online calculator and request forms.

- PHP backend: extending the existing code and working with the database
- **Online calculator** and request forms: data passed between frontend and backend
- Bug fixes, code optimization, new features

Stack: PHP, JavaScript, HTML5, CSS3

AI Search & SEO Intelligence Platform — Sep 2026 – Oct 2026

Commercial project · Windows desktop app

Technical SEO audit and AI-search visibility check.

- **130,000 lines** of TypeScript: crawler, **64 SEO rules**, 0–100 score
- Sites of 10,000+ pages: UI freezes of up to **12.8 s** eliminated
- Google Search Console, OpenAI, WordPress · **668 tests** · installer

Stack: TypeScript, Electron, React 19, Tailwind CSS, SQLite, Drizzle ORM, Vitest

Lead Collection Service — Jul 2026 – Aug 2026

Commercial project · Krasnodar

Leads from multiple sources → scoring → Telegram alerts and a CRM feed.

- Wrote **more than half of the code** and ran the service in production
- Scraping without a headless browser: less memory, cheaper server
- E2E tests for scrapers on live sites: layout changes are caught before users notice

Stack: Next.js 16, React 19, Node.js, Prisma, SQLite, grammY, Docker

Telegram Bot & Mini App for paying foreign services

Sep 2026 – Oct 2026

Commercial project · invite-only bot

Requests, pricing in rubles at the Central Bank rate, balances, subscriptions.

- React Mini App, Telegram signature verified on the server
- Balance from an operations ledger, amounts in minor units, **protection against double spending**
- Docker Compose, daily backups with restore checks, HTTPS

Stack: Node.js, Fastify, grammY, PostgreSQL, Prisma, React, Vite, Docker

Online Shop

Jul 2025 – Sep 2025

Commercial project · WooCommerce store · name and link under NDA, demo on request

Custom WooCommerce theme built from scratch: catalog, filters and a services calculator.

- Theme from scratch: custom catalog and product card templates, no default WooCommerce styles
- Filters (season, brand, size, studded, price): work via GET for SEO and without JS, with JS update the catalog **without a reload**
- Tire set calculator with services and delivery: services go into the cart and the order, **price is recalculated on the server**
- Docker Compose environment, catalog seeding with WP-CLI

Stack: PHP 8.3, WordPress, WooCommerce, MariaDB, JavaScript, HTML5, CSS3, Docker

Payroll System

Mar 2025 – May 2025

Commercial project · web app for a small manufacturer

Rates, bonuses, deductions and taxes for a small manufacturing business.

- Vanilla JS interface: tables update **without a page reload**
- Admin / employee roles, sessions, full history of every calculation

Stack: Node.js, Express 5, MongoDB, JavaScript, HTML5, CSS3
